**Formed by all 5 members of A Deeper Dreed, Maidallica is an act that plays tribute to the band's two biggest influences. Expect highly energetic sets where screaming at the top of your lungs is compulsory.**

A Deeper Dreed began its career as a covers band and quickly began work on tracking their first EP which was then released in November 2010. The band are now hard at work on writing a debut album, but wanted to continue playing tribute to the bands that influenced them. So in July 2010, the same members formed the band Maidallica which runs side by side with A Deeper Dreed to help to raise funds for future recording and production.

Maidallica picks tracks that spans both bands careers, rather than a particular era, providing a unique tribute performance. Tracks include (but are not limited to):
